

Complete and study the following for the upcoming test!!!

Define and give examples of the following terms:

- 1) Physical Change: _____

- 2) Chemical Change : _____

- 3) Conservation of Energy: _____

- 4) Chemical Property: _____

- 5) Physical Property: _____

- 6) Exothermic: _____

- 7) Endothermic: _____

Study Chemical equations lab.

Attach Lab to this study guide!

Answer the following short answer questions that will be on the test on a separate sheet of paper:

- a. Explain what the formula H_2 stands for.
- b. Describe a chemical Change.
- c. Define the term molecule
- d. List three physical properties of water
- e. Explain why dissolving is a physical change.
