

Student Page 1.1A: Floating Puzzles

Directions

Observations: Make observations on the puzzle on your table. Watch what is happening and write everything you see. Details are very important! You may also talk to your team members about what you see.

Questions: After completing your observations, write down as many questions as you can about the puzzle you just observed. Base your questions on your observations.

Puzzle #1: Cubes

Observations:

Questions:

Puzzle #2: Vials

Observations:

Questions:

Puzzle #3: Soft drink cans

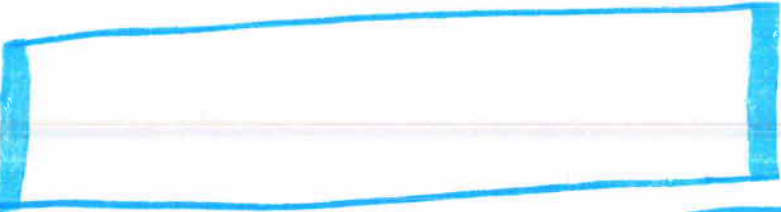

Observations:

Questions:

What did we do
in this lesson?

What Evidence
did we collect?

Big Ideas I took
away from the
lesson:

How would
you use the
evidence to
make a prediction?
