

Mrs. Winters' Class

Newsletter

Hello 7<sup>th</sup> grade parents!

I am once again so excited to get your amazing students back into the science classroom! It is about to get very busy these last few weeks of school and I am happy to share these last few weeks with your awesome students!

The **end of the 3<sup>rd</sup> trimester is next Friday May 23<sup>rd</sup>** and I just wanted to send another reminder that all **late/absent work** or even *extra credit* is **DUE NEXT WEDNESDAY** to give me time to grade and enter by Friday!!!! Just a reminder, extra credit can only count towards a student's grade IF they have *NO MISSING ASSIGNMENTS*. While most of the assignments won't get any credit because they are too late, they can open an avenue to bumping their grade a maximum of 5% with any extra credit they turn in!

The most exciting part of the 7<sup>th</sup> grade science year is coming up...for some it may be the scariest part of the 7<sup>th</sup> grade science year...The CADAVORS field trip!! I wanted to just let you and your student know what to expect this coming MONDAY the 19<sup>th</sup> as they go on this Shasta College field trip. The students will really have three mini tours; one of the campus (encouraging college readiness), one of the farm (learning about agriculture and science), and one of the science department cadaver room. Most students and parents may be a little nervous about the cadavers, but this part of the trip will include the following: 1) Mr. Croes a science professor will talk to the kids about *where the cadavers come from*, how they are *used in science* to further the *medical field*, *proper etiquette* when in the presence of a cadaver. 2) The students will be allowed to (wearing gloves) explore the cadavers. The students will not be cutting, they will just be able to explore what is already open to them, possibly holding organs or just looking, or pushing them to see where they are in the human body. **OPTIONAL**, students who do not want to go into the room with cadavers will have the option of waiting in a room that has models of different anatomy, different animals and a lot of fun (fake and plastic) science models (I may be in this room 😊).

One thing we do need for the field trip are latex gloves. If you would like to **DONATE** latex gloves for this trip that would be awesome 😊.

For the rest of the year you can expect the following:

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
19 <sup>TH</sup> Cadavors field trip	20 <sup>th</sup> Heritage Keepers Abstinence Program (permission slip required) OPEN HOUSE TONIGHT!	21 <sup>st</sup> Heritage Keepers Abstinence Program (permission slip required) (all late work and extra credit DUE)	22 <sup>nd</sup> Heritage Keepers Abstinence Program (permission slip required)	23 <sup>rd</sup> Finish popsicle stick trebuchets and test them.
26 <sup>th</sup> NO SCHOOL	27 <sup>th</sup> Medieval War with trebuchets	28 <sup>th</sup> Sound	29 <sup>th</sup> Sound and the ear	30 <sup>th</sup> Sound and the ear
2 <sup>nd</sup> WATERWORKS!!!	3 <sup>rd</sup> Review Labs and activities	4 <sup>th</sup> Review Labs and activities	5 <sup>th</sup> Review Labs and activities	6 <sup>th</sup> LAST DAY OF SCHOOL

Sincerely,

Mrs. Winters
